

# VariLoc

Solutions to Upper and Lower Extremities Fractures

THERAPY OPTIMIZED  
**EXPECT EXTRAORDINARY**

## Locking Compression Plate System

### Features & Benefits

#### *Good anatomical shape, low profile and blunt edges*

- No need to bend the plate, easy insertion and prevention of soft tissue damage.

#### *Unique multi-functional hole design to optimize strength plate*

- The smaller multi-functional hole enhances the mechanical properties.

#### *Variable angle locking screw*

- Variable angle feature allows optimal fragment fixation.
- The round locking holes accept both variable angle locking screw and standard locking screw.

#### *Cannulated locking screw*

- For optimal compression of intra-articular fractures.

#### *Color identification*

- Easiness in stock management and identification of sizes.

#### *Optimized screw case design*

- Solution to secure size and length availability

### Shoulder & Clavicle

Clavicle Hook Locking Compression Plate II

Clavicular S Reconstruction Locking Plate 3.5

Reconstruction Clavicular Locking Compression Plate 3.5

Anterolateral Clavicular Locking Compression Plate Plate, 2.7/3.5

### Bone Shaft

Straight Locking Compression Plate 3.5, thickness 4.0

Straight Locking Compression Plate 3.5, thickness 3.2

Straight Locking Compression Plate 4.5/5.0

Straight Locking Compression Plate 3.5, thickness 2.0

Straight Locking Compression Plate 3.5, thickness 3.8

### Foot & Ankle

Calcaneus Locking Plate II 3.5

Calcaneus Locking Plate III 3.5

### Wrist

Distal Lateral Radius Locking Compression Plate, 2.4/2.7

Distal Dorsal Radius Locking Compression Plate II, 2.4/2.7

Distal Lateral Ulna Locking Compression Plate, 2.4/2.7

Distal Radius Volar Column Locking Compression Plate II, 2.4/2.7

Distal Dorsal Radius Locking Compression Plate, oblique L, 2.4/2.7

Distal Radius Volar Locking Compression Plate, oblique T, 2.4/2.7

Distal Dorsal Radius T-Locking Compression Plate, 2.4/2.7

Distal Radius Two-Column Volar Plate II, 2.4/2.7

### Knee

Proximal Lateral Tibia L Locking Compression Plate 3.5

Distal Lateral Femoral Locking Compression Plate 5.0

### Hip/Pelvis

Proximal Lateral Femoral Plate 7.0
